

# CATHWEST

## INNOVATION COLLEGE

## What is an Innovation College?

Innovation means to find new and better ways to do something. CathWest Innovation College aims to provide students with a new and different way to learn. Our students will develop transferable, employment focused skills through ongoing engagement with businesses. Imagine working with business partners on major projects where your ideas create a better future and your learning is relevant and valued now!

## What makes CathWest different to my current school?

- 1 Students will work together in flexible learning spaces that replicate contemporary workplaces. Our staff will work alongside students - no more old fashioned classes!
- 2 Students will work in partnership to decide what they learn, how they learn and where they learn. Our college hours will be more flexible too!
- 3 Every student will have a learning mentor who will help them to meet deadlines and achieve goals.
- 4 Students will showcase their learning in various formats to a range of audiences.

## Is CathWest the right fit for me?

We are looking for motivated, enthusiastic, curious and courageous young adults who are willing to work towards solving real world problems. Our students will need to have a willingness to be leaders in changing the world one step at a time. We are enrolling students Year 10 and Year 11 from 2021.
