

INNOVATION COLLEGE

School done differently!

CathWest Innovation College opened in 2020. Our learning model is based on the latest research and is different from what you or your child may have experienced at school.

At CathWest Innovation College Students will:

- learn about the topics/projects/problems that interest them
- learn at the College, but also on the job, 'in the field' and online
- engage in a selection of workshops, tutorials and lectures mapped out by students with the support of their teachers
- experience adaptive learning spaces designed to meet the needs of students
- develop strong working relationships with teachers, peers, learning mentors, industry partners and other training partners such as TAFE and universities
- achieve outcomes through projects that are either school designed, co-constructed with students or relate to the specific business or passion project of the student
- work to respond to real problems and make a difference in the world

Parents will:

- engage with their child's online learning folio and be able to see progress and teacher feedback in real-time
- be able to provide feedback to their child on their progress and communicate with teachers/mentors online
